SEMINAR ON MALAYSIAN STANDARDS FOR EDIBLE- BIRDNEST INDUSTRY

The birdnest industry is worth multi million dollars in Asia. Malaysia alone exports about ten tonnes of what is considered **the finest bird nests** in the market, in comparisons to rival exporters from Thailand, Vietnam, Indonesia, Singapore, Cambodia and the Philippines. However, with the **tighter control** imposed by exporting countries, China in particular, the Malaysian edible-birdnest industry must be fully equipped with the vital knowledge that could assist them in **overcoming** the resulting **barriers** that could arise during **exports**.

Realising the economic importance of Edible-Birdnest, Department of Standards Malaysia (STANDARDS MALAYSIA) had published a number of Malaysian Standards (MS) for Edible-Birdnest industry.

The Technical Committee on Edible-Birdnest (EBN) Swiftlet Ranching which developed the Malaysian Standards referred to in this seminar was established within the National Standards Development Systems under the purview of STANDARDS MALAYSIA, a government agency under the Ministry of Science, Technology and Innovation (MOSTI).

This event is managed by SIRIM Berhad. For more information, please contact the secretariat as follows:

About the standards:

- **MS 2273: 2012** prescribes the requirements in **ranching practices** of edible-birdnest swiftlets. It relates to the establishment of **good animal husbandry practice** for continuous improvement and sustainable production of its produce, whilst ensuring health, safety and comfort to both the operators and the birds, with no degradation to the environment
- **MS 2333: 2010** provides a guideline for the EBN **processors** for the production of **quality and safe EBN** for human consumption
- **MS 2334: 2011** prescribes the requirements for the **grading** of raw-unclean EBN and raw-clean EBN
- **MS 2503: 2012** prescribes the requirements for **good animal husbandry practices** involve in **cave edible-nest swiftlet** ranching
- **MS 2509: 2012** prescribes the **test method of nitrites** applicable to EBN

Adherence to these standards would demonstrate compliance to best practice as well as ensure production of finest quality birdnest, in tandem with current market demand.

Why should you attend?

- To get an **update** on the latest development for edible-birdnest and swiftlet ranching;
- To gain knowledge on **Malaysian standards and their applications** in swiftlet ranching and EBN processing;
- To know the **minimum requirements** for EBN industry;
- To know the **export and import requirements** for EBN;
- To increase awareness on the importance of GAHP in swiftlet ranching & GMP in processing EBN and the benefits of such practices; and
- To share experience and promote better understanding of the respective requirements and establish networking for EBN industry in Malaysia.

Who should attend?

- PRODUCERS
- IMPORTERS/EXPORTERS
- GOVERNMENT OFFICERS
- RETAILERS
- CONSUMERS
- TRADERS
